

SV210 SERIES SAFETY VENT SOCKETS

ZERO-PRESSURE CONNECT AND DISCONNECT DESIGN ARO INTERCHANGE

Foster's SV210 Series Safety Vent Sockets

- Perfect for the Industrial and ARO Interchange profiles
- Extra thick heat-treated steel walls extend service life
- Zero pressure design vents downstream pressure for safe, easy connect/ disconnect
- Silicone-free assembly
- Foster SV and SVPC Series Safety Vent couplings are designed for maximum user and equipment safety
- Rubber or polyurethane hose connections available
- No value, spring, or washer to restrict flow of air
- "O-Ring" plug seal for leak-free performance

Foster SV and SVPC Series Safety Vent couplings are designed for maximum user and equipment safety. Foster SV and SVPC Series couplings allow for safe and easy connection/disconnection under zero line pressure to minimize the possibility of inadvertent disconnection and potential hose whip.

The fully encapsulated non-marring models significantly reduce the risk of surface nicks and scratches. Ideal for use in paint booth applications or for air lines used around finished surfaces, such as fiberglass, painted metal or glass surfaces.
