

STAINLESS STEEL FITTINGS

Stainless Steel Fittings are essential components used in various industries for connecting pipes and tubing. Crafted from durable stainless steel, these fittings ensure corrosion resistance and long-lasting performance. From pipe connections to valves and flanges, our stainless steel fittings provide secure and leak-resistant solutions for your industrial needs. The full product line is available in 316 stainless, 304 stainless, and carbon steel.

Industries Served

Hydraulics

Chemical Processing

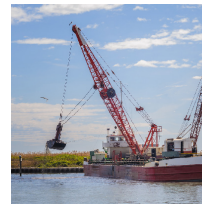

Food & Beverage

Biotechnology

Marine

Oil & Gas

NPT - National Pipe Taper

Available in 304SS, 316SS, and Carbon Steel
